The following is an examiner's statement of reasons for allowance: Hickman discloses a force script implementation over a wide area network.

Clem discloses an interactive programmable fitness interface system.

Watterson et al disclose a system and method for providing an improved exercise device with motivational programming.

The prior art however, fails to show or suggest, as detailed in claim 1, a system for monitoring cumulative fitness activity for a user, said system comprising means for receiving at least one type of exercise indicator signal associated with exercise performed by a particular user from a particular exercise machine in a common transmittable data format at a portable computer system provided by said particular user; and means for computing and storing current cumulative fitness activity for said particular user at said portable computer system utilizing said at least one type of exercise indicator signal and previously stored cumulative fitness activity data from prior exercise by said particular user at a plurality of diverse exercise machines, such that said portable computer system associated with said particular user monitors the real-time cumulative fitness activity of said particular user from said at least one type of exercise indicator signal currently received from said particular exercise machine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
